THE WET STRAW.

He had passed his first ten years in prison without doing anything, settling himself and fitting himself to the habits of the place. Then, as there were yet 20 years of prison life before him, he said one fine morning that it was shameful to lead so idle a life, and that he must create for himself some occupation worthy not of a freeman, since he was a prisoner, but worthy simply of a man. He devoted a year to reflection, to weigh-

ing the different ideas which presented themselves, to seeking a definite aim for his existence.

"I must," said he, "find something at the same time novel, useful and defying I must invent a task which shall occupy my time, which shall be productive of some good and which shall have the value of a protest." Another year was employed in this search, and at last success crowned

It was a veritable dungeon, that in which the prisoner lived, which the sun entered but for one short half hour daily, and then by a single ray, which was a mere thread of light. The bed on which the unhappy man stretched his aching limbs was a pile of wet straw.

"The very thing," he cried, with en-

"Now I shall defy my jailers and chest the courts." First be counted the separate straws that made up his bundle. There were

1,307 straws, a meager bundle! Then he made an experiment to find

out how long it would take to dry a single straw. Three-quarters of an hour. It would require for them all, for the 1,307 straws, a total of 980 hours and 15 minutes, with a half hour of sunshine a day 1,931 days. Calculating that the son would not shine at least one day out of three, it would require 16 years, 1 month, 1 week and 6 days. He set to work at once.

Every day that the sun shone the prisoner carried a straw and put it in the sun-shine, busying himself thus whenever there was sun. For the rest of the time he kept warm under his clothes the straws which he had been able to dry.
Thus ten years passed. The prisoner slept on only a third of the bundle of the

damp straw, and he had stuffed in the bosom of his blouse the other two-thirds which, one by one, he had dried. Fifteen years passed. Happiness un-speakable! Only 126 damp straws re-

Eighty-four days more, and the prisoner could scarcely contain himself. Proud of his work, victory over circumstances, he cried, with the voice of an avenger, with a mocking, rebellious laugh:

'Ah! ah! You condemned me to the wet straw of a dungeon! Well, weep with rage! I sleep on dry straw.' Ains! a cruel destiny was watching for

One night, while the prisoner dreamed of the happiness in store for him, in his wild joy he threw out his hands in speechless exultation, overset his water jug, and the water ran trickling down his breast.

All of the straws were wet.
What to do now! To begin again the toll of Sisyphus! To pass 15 years more putting straws to dry in the slender ray? Oh, the discouragement of it!

But, you say, he had only 134 years more in prison. And do you count as nothing wounded pride, fallen hope? Think, this man would have worked 15 years to sleep on a bundle of dry straw, and should be consent to quit his prison with wet straws

Pardon me that I desert my post; that I quit the field of battle; that I flee like a coward. I can bear it no longer." Then in a sudden access of indignation he cried:

'No, no, a thousand times no! It shall not be said that I have lost my life for
